

AQUALISA

PRESS RELEASE

May 2008

The Midas Touch

Midas, a new range of thermostatic showers from Aqualisa has the golden touch – but thankfully – only in the design and functionality sense.

Finished in smart, hard-wearing chrome, Midas 100 and Midas 200 focus upon delivering contemporary looks combined with outstanding performance: a winning blend of practicality and aesthetics that have become an Aqualisa hallmark.

Both Midas showers feature a fully thermostatic, exposed valve built into a sleek, cylindrical body and offer the option of an innovative, concealed fixing bracket that makes installation as easy as 1-2-3. For complete design versatility, Midas 100 and Midas 200 bath/shower mixers are also available and to co-ordinate the look, there is also a Midas monobloc basin tap for high pressure systems. An adjustable height, multi-mode shower head with three individual spray patterns is included with Midas 100 and 200 showers or bath/shower mixers.

There's also a Midas to suit every type of plumbing system. Midas 100 is suitable for combination boiler and high pressure water systems, whilst Midas 200 is available both in a low pressure variant, suitable for gravity-fed water systems, and a high pressure variant suitable for combination boilers and high pressure water systems. But whatever the plumbing system, a Midas shower or bath/shower mixer can be sure to deliver: partnered with a low pressure gravity-fed plumbing system, Midas 200 provides an impressive 7 litres of water per minute* - that's double the flow of some of its market contemporaries. Meanwhile, install the high pressure variant of Midas 200 on a high pressure system and up to 18 litres** of water a minute will rain down.

However, whilst the Midas performance is unquestionably impressive, there's also the option to keep an eye on water usage, as all variants feature a flow control knob. Plus, a clever eco stop – found on the control of high pressure Midas 200 shower and bath shower mixer lets the user control the water's flow rate and is great for anyone watching their water consumption.

Midas 100 Showers and Bath/Shower Mixers

- Fully thermostatic, exposed shower or bath/shower mixer
- Easy selection between bath and shower on Midas 100 bath/shower mixer – lift and twist to shower, twist and release to bathe
- Maximum temperature override button
- Quality metal construction; smart chrome finish
- Please your plumber – clever, innovative fixing bracket makes installation a doddle
- Design versatility – Midas 100 bath/shower mixers can be deck or wall mounted; Midas 100 showers can be fitted onto a solid wall, stud wall or even panel mounted
- Suitable for combination boiler and high pressure systems
- 12 litre, 9 litre and 6 litre per minute flow regulators available
