PRESS RELEASE

July 2009

Aqualisa Launches Aquastyle Electric

Aqualisa has launched a new electric shower. **Aquastyle Electric**, which will be available from 1st July at distributors and merchants UK-wide, is an entry-level electric shower with value-for-money credentials that are certain to appeal to installers looking for a reliable electric showering solution.

Available in 8.5kW, 9.5kW and 10.5kW engine sizes, Aquastyle Electric is an instantaneous electric shower system that heats water on demand - placing no requirement on the household's hot water system. An integral phased shutdown feature means that retained hot water is gradually flushed out at the end of every shower – avoiding an unpleasant hangover of hot water for the next user and importantly, preventing limescale from damaging the shower's element.

In addition, Aquastyle Electric also offers the user uncomplicated functionality with a simple push button start/stop control, easy glide temperature selector and an adjustable height handset that comes complete with Aqualisa's patented 'Active Nozzles'.
