

AQUALISA

PRESS RELEASE

5th March 2010

Aqualisa Raises the Bar

Aqualisa has launched a brand new thermostatic exposed shower and bath shower mixer range. Following in the footsteps of its hugely successful Midas 100 and 200 ranges, the **Midas 300** collection retains all the user friendly features that have made its sibling products so popular, but introduces a new, luxurious adjustable height showerhead and slider rail configuration that comes complete with a contemporary pancake style showerhead and a striking, smooth chrome hose.

Midas 300 offers a host of well thought out, considerate details. These include an extra long, contemporary slider rail for a stylish, luxurious look, an audible 'click' mechanism in the shower head spray selector that helps the user to positively identify spray pattern preference and an innovative, discreet anti-twist hose connection – all of which make for greater convenience and comfort. In addition, the Midas 300 thermostatic bath shower mixer can be deck or wall mounted, is fully compatible with the new Part G building regulations and features a lockable maximum temperature limit.

With their top quality, brass-bodied construction, Aqualisa's Midas showers and bath shower mixers have always had an enviable reputation for performance and the new Midas 300 products maintain this tradition of superb flow rates and perfectly defined spray patterns, whether installed on a low or high pressure plumbing system. However, for 'greener' installations, the eco stop flow control (available on the high pressure Midas 300 variant) and availability of 6, 9 or 12 litres per minute flow regulators will no doubt prove a popular feature!

Finally, the new Midas 300 showers are also compatible with Aqualisa's easy-fit fixing bracket. Designed to make fitting a bar valve shower as easy as possible, whatever the type of fixing surface (e.g. stud wall, brick, panel), the bracket offers a wide-range of time-saving features that
